Bornov Shyam Kalita

+91-7576909883 bornovofficial@gmail.com LinkedIn Portfolio Writeups

Professional Summary

Electronics & Communication Engineering student at NIT Silchar specializing in **DFIR** and **Cyber Threat Intelligence**, with a focus on adversary profiling, malware analysis, and threat actor attribution. Demonstrated through public investigation writeups, a self-built enterprise-grade HomeLab, and competitive CTF performance — including **Top 200 globally** in HTB University CTF and **Top 5%** in THM Industrial Intrusion CTF. Targeting a career as a Threat Intelligence Analyst.

Technical Experience

Cybersecurity Researcher (Offensive, DFIR & OSINT) April 2025 – Present
Independent Projects & Labs

- **[Threat Intel Writeups]:** Authored public investigations documenting full attack chains, MITRE ATT&CK mapping, and threat actor attribution — wizardbornov.github.io/DFIR-Threat-Intelligence-Investigations
  - *WannaCry Memory Forensics* — Volatility-based analysis; mutex IOC extraction; process injection detection via DKOM evasion.
  - *BadRabbit Threat Intelligence* — Phishing-to-MBR-destruction chain; Sandworm (GRU Unit 74455) attribution; dynamic analysis via ANY.RUN & VirusTotal.
- **[DFIR & Detection]:** Leveraged Splunk to analyze authentication and system logs; reconstructed intrusion timelines identifying TTPs, persistence mechanisms, and IOCs. Applied Microsoft Defender XDR and Defender for Cloud to detect and remediate cloud and on-premises threats.
- **[HomeLab]:** Architected enterprise-simulated homelab with 5–7 VMs across segmented Linux and Windows networks; executed 20+ red team exercises covering enumeration, service exploitation, and network traffic analysis.
- **[OSINT]:** Conducted 15+ investigations using a cross-verification methodology (3–5 independent sources); synthesized findings into actionable intelligence reports following the standard intelligence cycle.
- **[Web Security]:** Completed 60+ labs covering OWASP Top 10 (SQLi, XSS, Broken Access Control); identified 20+ authorization flaws in simulated environments.

Security Audit Project Feb 2026
Google Cybersecurity Professional Certificate

- Performed a security audit per NIST CSF guidelines; identified critical misconfigurations in network configurations and access controls and documented findings as actionable business insights.

Leadership & Communication

Host, NITSHACKS 8.0 — *NIT Silchar* Nov 2025

- Hosted opening and closing ceremonies for North-East India's largest technical hackathon with 3,000+ participants.

CTF Player 2025 – Present

- Ranked **Top 200 globally** and **Top 5 in India** at HTB University CTF; **Top 5% globally** at THM Industrial Intrusion CTF (ICS/SCADA focus).
- Led 3-member teams under competition pressure; produced technical write-ups translating findings into actionable insights.

Education

B.Tech in Electronics & Communication Engineering 2024 – 2028
National Institute of Technology Silchar, India CGPA: 8.6 / 10

Senior Secondary (Class XII) May 2024
Spring Dale International School (CBSE) Awarded Student of the Year

Certifications & Training

- **Google Cybersecurity Professional Certificate** — In Progress — Google
- **Microsoft Certified: Security Operations Analyst Associate** — In Progress — Microsoft
- **TryHackMe – Cyber Security 101** — TryHackMe
- **PortSwigger Web Security Academy** — 60+ completed labs in web application security — PortSwigger

Technical Skills

Security Specializations	DFIR • Threat Intelligence • OSINT • Penetration Testing • Vulnerability Assessment • SecOps
DFIR & Analysis	Volatility • Splunk • Autopsy • Redline • KAPE • EZ Tools • FTK Imager • ANY.RUN
Security Tools	Burp Suite • Nmap • Wireshark • Ghidra
Frameworks	MITRE ATT&CK • OWASP Top 10 • NIST CSF • Cyber Kill Chain • IR Lifecycle
Operating Systems	Linux (Kali, Ubuntu, Parrot) • Windows Server • Active Directory • VMware
Programming	Python • Bash/Shell • C/C++ • SQL • JavaScript • Solidity
Tools & Technologies	Git/GitHub • Docker • Virtualization • Firewalls • IDS/IPS
